Abstract   Please make sure NO reference number in your Abstract since it is misunderstood independent of full text.

Keywords   Aaaa, bbbb, cccc. (Please note the keywords by the way a-z.)

1   Introduction

1.1   A Subsection

Please make sure that your paper contains correct reference sequence (If NOT, please resort them according to its appearance sequence, not alphabetical order. Moreover, please make sure that each bibliographical item is labelled and that these items are recalled using the command `\cite{\cdots}`, such as [**? ?**], and [**? ? ?**]).

All equations, theorems, definitions, lemmas, propositions, assumptions, corollaries, examples, remarks, etc. would be better to be numbered consecutively and unrepeatedly within each section. For example, Definition 2.1, Lemma 2.2, Theorem 2.3 $\cdots$.

Notice the Greek capital letter required for your article must be italic. For example, $\Gamma, \Theta, \Lambda, \Psi, \Omega, \cdots$. Please make sure that the classified text in your paper are cited by the labels 1), 2), 3), $\cdots$, (i), (ii), (iii),$\cdots$, or (h), (i), (g),$\cdots$. In addition, please make sure that the elements in a sequence list two items before an ellipsis is added, such as $\{f(x_i),\ i = 1, 2, \cdots, n\}$, $y_1 < y_2 < \cdots < y_n$, $A = A_1 + A_2 + \cdots + A_m$, $\cdots$.

References cited together in the text should be arranged chronologically, e.g. the results on target aggregation of first-order agent model[**?**]$\cdots$

Use `\label` and `\ref` or `\eqref` to automatically cross-reference sections, equations, theorems and theorem-like environments, tables, figures, etc.

In all text and formulas, Notice the Greek capital letter must be italic.
